L. F. GARLINGHOUSE CO.,

115 Eighth Ave., East,

Topeka, Kansas

The Importance of Plan Books and Complete Plans

The building of a home is one of the most important events in life.

In selecting your home from our books you see exactly how it will appear after construction—a home designed for beauty as well as economy.

In using GARLINGHOUSE plans to build from, the chance of costly errors is reduced to a minimum.

To build a home without a plan or with only hastily drawn sketches, is at best, guess work. It can be done, but the process is generally costly and the result usually unsatisfactory.

Our complete plans and specifications will save you many times their cost. All guess work is eliminated and there is little chance of construction errors.

A wise man plans before he builds and our business is to help you and your customers plan homes.

Our books and plans are available to you at nominal costs. You cannot afford to build your home without a GARLINGHOUSE plan.

A set of our complete plans include—

PLANS—The complete working plans consist of blue prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-fourth inch to one foot.

SPECIFICATIONS—The specifications explain every detail of the construction of the house from the excavation to the interior decorations.

LUMBER AND MILL LISTS—The lumber and mill lists consist of an itemized list of the lumber and mill materials needed to construct the building and stating where each item should be used.
